Group Details

Group Name: The Flight Detectives

Team Members:

1. Ganpat Patel
2. Adnan Ali
3. Jatinkumar Parmar
4. Musa Ummar

Project Subject

Dataset: Flight Price Prediction

Link: https://www.kaggle.com/datasets/shubhambathwal/flight-price-prediction/data

Description: The objective of this study is to analyze the flight booking dataset obtained from the "EaseMyTrip" website and develop a predictive model. The goal is to train the dataset to forecast a continuous target variable, enabling accurate price predictions for flight tickets. By conducting various statistical hypothesis tests, we aim to extract meaningful insights that will enhance the decision-making process for passengers. This predictive analysis will help travelers anticipate ticket prices and make informed booking decisions.

Data Types:

S. No.	Column Name	Data Type
1	airline	String
2	flight	String
3	source_city	String
4	departure_time	String
5	stops	String
6	arrival_time	String
7	destination_city	String
8	class	String
9	duration	Float
10	days_left	Integer
11	price	Integer
